

Advanced Limb Restoration TAYLOR SPATIAL FRAME[®] Course

June 22-23, 2018

Memphis, TN

Save the date | 2018

Course Description:

This course is designed for the orthopaedic surgeon who wants to take his/her knowledge of the TAYLOR SPATIAL FRAME to the next level. Topics including deformity analysis, corticotomy considerations, and post-operative management and complications will be covered by an internationally renowned faculty through lectures, specialty specific breakout sessions, and sawbones labs. The specialty specific breakout sessions will be interactive and allow participants to discuss relevant topics and share experiences in a small group format.

WHO SHOULD ATTEND

This course is intended for surgeons with significant experience using the Taylor Spatial Frame. This is not a beginner course. Surgeons should meet the following requirements to ensure a productive learning experience:

- Attended an Essentials of TAYLOR SPATIAL FRAME Course **AND** completed a minimum of 11 frames; **OR**
- Completed a minimum of 21+ frames..

Course Location:

Smith & Nephew Innovation Centre
7135 Goodlett Farms Parkway
Cordova, TN
