Manage PTRCT in Overhead Athletes

Join our expert panel in a discussion relating to the treatment of symptomatic high-grade partial tears in high-performance athletes. Topics will include tear characteristics, surgical strategy, when to operate, use and evidence of REGENETEN, HEALICOIL and REGENESORB, as well as case presentations.

After attending this webinar, participants will be able to:

- Describe the biology of tendon healing in rotator cuff disease
- Relate causes and effects of compromised rotator cuff healing
- Choose the right surgical strategy for PT in young overhead athletes
- Explain science and mechanism of action of the REGENETEN Bio-inductive implant

Faculty/Moderator:
Dr. Michael Freehill
Stanford University

Faculty:
Dr. Ryan Simovitch
Hospital for Special Services Florida
